UNIVERSITY OF APPLIED SCIENCES - FACULTY OF AGRICULTURAL SCIENCE AND LANDSCAPE ARCHITECTURE

Program:	International Summer University Landscaping Industries 2017 (ISUL) at Osnabrueck University of Applied Sciences, Germany
Date:	May 22 th – June 09 th 2017
Term:	Summer
Number of Credits:	3
Enrollment Restrictions:	Experience in Construction Design and Graphic Expressions
Application Documents:	- Grading Plan - Construction Detail Plan
Class Standing:	Undergraduate, Bachelor: freshman sophomore, junior and senior Graduate, Master: all

Deadline for Registration: March 31st 2017

The Program:

- Project “Quality in Landscape Construction for a Sustainable Horticulture Design and Landscape Industry”
Students from the United States and Germany will work together on a project, in small groups, in order to find a technical solution to a landscape construction project. For the project, the students will get a draft from a recognized landscape architecture office. This draft will be worked on within the context of construction documentation to the preparation of the bidding procedure. The students will compare the different solution approaches from the German and the American cultural regions and try to find a solution together.

The goal for the students is to develop an understanding of the construction and the building management beyond the national standards.
- Lectures in Quality in Landscape Construction
Here, German professors will answer technical questions regarding the project that the students will be working on in order for them to complete the project correctly. The professors will give information about the different approaches used in the United States and in Germany.
- Excursion “European Metropolises”:
Hosting Cities: Munich (Germany), Salzburg (Austria), Vienna (Austria)
These cities in the excursion are some of the most notable cities in Europe. The students will visit current important projects in the field of landscape architecture and constructional engineering.

„ISU Landscaping Industries“

The goal of the excursion is to experience the cultural importance of these cities, but also to get to know the constructional solution approaches and how to create quality.

Accommodation and Meals

During the excursion the students will be housed in hotels in the different cities with the German Students. During the project work in Osnabrueck, the students will stay in a Backpackers Penthouse in the city.

Meals are not included in the costs of the program. During the project work, the students will get the possibility to eat in the university cafeteria. In addition, the German students will show places where cheap and good meals can be purchased in Osnabrueck.

Program cost includes (billable)

- Tuition
- Excursion
- Program Administration
- Housing

Program cost does not include (non-billable)

- Travel to Germany, Osnabrueck
- Travel from Germany back home
